Don Brenman
Lubri-Lab International
Tampa, FL

Dear Don,

When you visited you said you had a product that would eliminate the wear on our bearings and bushings. Specifically mentioning our Menzi Muck all terrain vehicles. I told you that if you had a product that would help "I was interested." These machines are used for digging and mowing under wet and muddy conditions. I was currently changing 8 bearings a month on the 4 units we own. Needless to say one was always in the shop.

Impressed by your demo and guarantee for success we ordered your grease six months ago.

I am glad to report I have not had one machine in the shop and have not changed a single bearing in the mowers or the mower heads since using your grease. We also have started greasing the booms the way you suggested and have eliminated the chatter associated with telescoping booms.

I highly recommend your products and integrity to anyone interested.

Sincerely,

A handwritten signature in black ink, appearing to read "John Brown". The signature is written in a cursive style with a large, looping initial "J".
